EDUCATION

- 2023 - 2025
MSc in Cloud Computing
University of Mumbai
- 2022
BSc in IT
University of Mumbai
- 2019
XII
CBSE, HSC
- 2017
X
CBSE, SSC

IT SKILLS

- Java Development
- Server-Side Technologies
- Front-End Design
- Full-Stack Development
- Infrastructure Automation

CORE COMPETENCIES

Java Core	
System Integration	
Software Development Life Cycle (SDLC)	
Modular coding	
Development Pipelines	
Continuous Integration	
App Reliability	
Application Delivery	
System Optimization	

AWARDS & HIGHLIGHTS

Deepak Ravindra Tripathi

Full-Stack Developer (Front-End & Back-End)

ABOUT ME

A passionate Full-stack Developer skilled in building scalable, user-friendly solutions, with expertise in both front-end and back-end technologies

PROFILE SUMMARY

- Results-driven Full-Stack Java Developer with 3+ years of experience in designing and developing scalable web applications.
- Proficient in technologies such as Spring Boot, MVC, Angular, React, Bootstrap, MySQL, and MongoDB.
- Skilled in backend development, REST API design, and microservices architecture.
- Proven expertise in optimizing application performance, improving response times, and enhancing scalability for seamless user experiences.
- Experienced in cloud-based deployments, CI/CD pipelines, and system integrations.
- Passionate about delivering robust and efficient full-stack solutions.
- Adapt in using frontend frameworks to create responsive and user-friendly interfaces.
-

CERTIFICATION

- Full Stack Java development Course (IT Vedant)
- Java Certified (Udemy)
- Certified in Data Structures and Algorithms (Udemy)
- Python Certified
- Catapult Networking L2 Certified (Wipro)
- AWS Cloud Essentials Certified (Amazon)

PROJECTS

- AI-Powered Job Description (JD) Analyzer** Built an AI system to analyse job descriptions, extract key skills, and match profiles for hiring recommendations. Technologies: Python, NLP libraries, and a web-based interface for customization. Enhanced recruitment efficiency by providing industry-specific insights. Integrated analytics for tracking hiring trends and improving recruitment strategies.
- Arithmetic Challenge Game** Developed a math-based game to solve timed arithmetic problems, promoting mental agility and quick calculations. Technologies: React, Spring Boot, and Bootstrap for front-end and backend functionality. Features adjustable difficulty levels and score tracking for engaging user experiences. Integrated multiplayer mode, allowing users to compete in real-time challenges for added excitement.
- Movie Review Sentiment Analyzer** Developed a system to analyze and classify movie reviews based on their sentiment (positive, negative, or neutral). Technologies: Angular for the front-end, Spring Boot for the backend, and Java as the core programming language. Delivered audience insights with an intuitive user interface and visualized sentiment statistics for easy movie comparisons.

- Best Full-Stack Developer of the Year
- Successfully led full-stack development projects, enhancing system functionality and user experience.
- Implemented code modularity measures that significantly improved system reliability and performance.
- Mentored junior team members, fostering a culture of continuous learning and development.

WORK EXPERIENCE

May
2022 to
Present

Full-Stack Developer (Front-End & Back-End)
Wipro
Role:

- Leading full-stack development projects, ensuring seamless integration of front-end and back-end solutions.
- Collaborating with cross-functional teams to optimize software performance and user experience.
- Implementing innovative solutions to enhance system performance and scalability.
- Conducting thorough testing and debugging to maintain high-quality standards.
- Providing technical guidance and mentorship to junior team members.
- Participating in code reviews and contributing to continuous improvement efforts.
- Researching and applying best practices in software development.
- Ensuring compliance with coding standards and project requirements.
- Developing a testing framework that significantly reduced bug resolution time and improved team efficiency.
